OXYGENATING ENZYME PEEL \$139 | ⌚ 1 Hour

This treatment increases hydration of the skin cells whilst significantly accelerating the skin's cellular renewal process. Hydrate, plump and renew the skin in just one application!

MICRODERMABRASION

\$90 per treatment

Microdermabrasion is a skin resurfacing treatment. Resurfacing is a technique for removing the topmost layer of skin leaving it renewed and vibrant, with a smoother texture and promotes the growth of healthy new skin cells. The skin is exfoliated with a natural diamond chip wand while at the same time vacuuming the dead skin cells away in a sterile controlled manner.

This process of skin renewal will soften and smooth fine lines, lighten pigment and improve acne and other skin imperfections.

LED LIGHT THERAPY

LED is one of the latest and best non- invasive anti-aging treatments in the world today – it is collagen building for aging skin, wound healing and acne reduction. Science has proven that the body has a positive response to three specific wavelengths; 420nm (blue) kills the bacteria that cause acne, 633nm (red) stimulates collagen and increases elasticity, 830nm (infrared) stimulates the tissue and speeds up cell renewal to increase wound healing.

\$60 per 20min session or \$35 when added to any facial service.

FEATHER TOUCH EYEBROWS

\$495

Permanent makeup technique that creates natural, feathery hair strokes.

Sparse eyebrows & gaps can be beautifully filled in for any hair colour and skin tone. This unique tool is designed to create dimension in the brows, rather than a solid colour application, for a more natural & authentic look.

SKIN NEEDLING

Micro Needling /Dermapen is a revolutionary device which tightens, lifts and rejuvenates skin. Skin needling stimulates the production of your collagen to create smoother, healthier skin. It reduces acne scarring, stretch marks, fine lines, pigmentation, enlarged pores, blackheads and scarring with very little downtime.

In addition Micro needling is a fantastic product delivery device. Any active skin care product applied to the skin during or immediately after the treatment is readily absorbed into the deeper layers of the skin, rendering it much more effective than with a traditional topical application.
